

Find each angle measure.

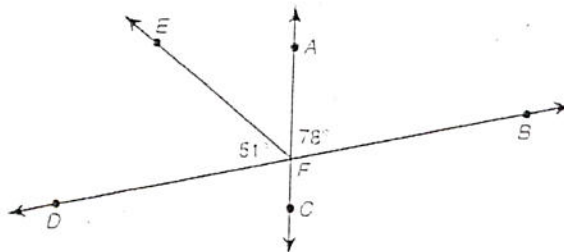

9. $m\angle CFB$ if $\angle AFC$ is a straight angle.

10. $m\angle EFA$ if the angle is congruent to $\angle DFE$.

11. $m\angle EFC$ if $\angle DFC \cong \angle AFB$.

12. $m\angle CFG$ if \overline{FG} is an angle bisector of $\angle CFB$.

Find each angle measure.
